THE OTHER WORLD.

It lies around us fike a cloud,—
A world we do not see;
Yet the sweet closing of an eye
May bring us there to be,

Its gentle breezes fan our cheek; Amid our worthy cares Its gentle voices whisper love, Ami mingle with our prayers. Sweet hearts around us throb and beat, Sweet helping hands are stirred, And palpitates the veil between With breathing almost heard.

The silence—awful, sweet and calm-Ther have no power to break; For mertal words are not for them To utter or partake.

So thin, so soft, so sweet they glide, So near to press they seem,— They seem to loll us to our rest, And melt into our dream.

And in the lush of rest they bring. Tis easy how to see Hew leverl and how sweet a pass. The hour of death may be.

To close the eye, and close the ear, Wrapped in a trance of bliss, And gently dream in loving arms To swoon to that—from this. Scarce knowing if we wake or sirep, Scarce asking where we are, To feel all evil sink away, All sorrow and all eze.

Sweet souls around us! watch us still Press nearer to our side, Into our thoughts, into our prayers, With gentle belpings glide.

Let death between us be as naught.
A dried and vanished stream;
Your joy be the reality,
Our suffering life the dream.
—[Harriet Beecher:

BRAERMAN WHO WENT TO

To me comes the brakeman, and seating himself on the arm of the seat "I went to church yester-

"Yes?" I said, with that interested inflection that asks for more. "And what church did you attend?" "Which do you guess?" he asked.

"Naw," he said, "I don't like to rur on these branch roads very much. I don't often go to church, and when I do, I want to run on the main line, where your run is regular and you go on a schedule time and don't have to wait on connections. I don't like to run on a branch. Good enough, but I don't like it."

"Episcopal?" I guessed.
"Limited express," he said, "all palace cars and \$2 extra for a seat: fast time, and only stops at the big stations. Nice line, but too exhaustive for brakemen. All train men in uniform, conductor's punch and lantern silver plated, and no train boys allowed. Then the passengers are allowed to talk back at the conductor; and it makes them too free and easy. No I couldn't stand the palace cars. Rich road though. Don't often hear of a receiver being appointed for that line. Some mighty nice people travel on it, too."

"Universalist?" I guessed.
"Broad guage," said the brakeman,
"does too much complimentary business. Everybody travels on a pass.
Conductor doesn't get a fare once in
fifty-miles. Stops at 'all flag stations,
and won't run into anything but a
union depot. No smoking car on the
train. Train orders are vague, though,
and the trainmen don't get along well
with the passengers. No, I don't go to
the Universalist, though I know some
awfully good men who run on that
road."

road."
"Perhaps you went to the Unitarians?"

rians?"
"No, I didn't, but I might have done worse. That is a mighty good road, well ballasted with reason, though it runs through a region a little bit cold, well ballasted with reason, though it runs through a region a little bit cold, and there is apt to be some ice and snow on the track, but in case of accident there is no danger of upsetting the stoves and being burnt up; and there's one good thing about it, the neighbors are generally ready to come and help when you do get into trouble. They like to have things nice and comfortable in this world, doing what they it think is about right and taking their chances for the other. They don't seem to take much stock in being as miserable as you can here in the hope that you will be the happier for it there. They seem to think that a man's going to reap the same kind of it crop that he plants, and that if he puts in a selfish, worthless kind of a life on this earth it ain't a-going to come out a very fine specimen in heaven. Seems to be some sense as well as poetry in that, but I was raised an "orthodox" and 'twouldn't do for me to be seen on that train or I might lose my place on the other line, as there's a good deal of competition between the

SCIENTIFIC MISCELLANY.

with some enthusiasm. "Nice road eh? Fast time and plenty of passen-It is stated that a new photographic It is stated that a new photographic process has just been discovered in Japan. One of the substances employed in the manufacture of Japanese lacquer has the property of becoming almost as hard as stone under the action of light. A slab covered with this material and duly exposed behind a photographic negative for some twelve hours, was scraped, and rubbed with a spatula and brush, leaving the hardened portions raised in low relief, and capable of being used as a block for printing. gers. Engines carry plenty of steam, and don't you forget it; steam gauge shows a hundred and enough all the time. Lively road; when the conduc-tor shouts 'all aboard,' you can hear him to the next station. Every train lamp shines like a headlight. Stop over checks given on all through tickets; passengers drop off the train as often as they like, do the station two or three days and hop on the next revival three days and hop on the next revival train that comes thundering along. Good, whole-souled, campanionable conductors; ain't a road in the country where the passengers feel more at home. No passes; every passenger pays full traffic rates for his ticket. Weslevan house air brake on all trains, too. Pretty safe road, but I didn't ride over it vesterals."

One of the novelties of Breslan is a paper chimney, about fifty feet high, rendered fire-proof by chemical treat-

Observations of snow collected on mountain tops, and within the Arctic circle, far beyond the influence of factories and smoke, confirm the supposition that minute particles of iron float in the atmosphere, and in time fall to the earth. Many scientists believe these floating particles to bear some relation to the phenomena of the surgess. Green "Maybe you went to the Congrega-tional church?" I said. " Popular road," said the brakeman, "an old road, too; one of the very oldest in this country. Good road bed and comfortable cars. Well managed road, too; directors don't interfere with division superintendents and train floating particles to bear some relation to the phenomena of the aurora. Gronemann, of Gottingen, for instance, contends that streams of the particles revolve around the sun, and that, when passing the earth, they are attracted to the poles, thence stretching forth as long filaments into space; but, as they travel with planetary velocity, they become ignited by friction with the earth's atmosphere, and in this way produce the well-know luminous appearance of the aurora. Prof. Nordenskjold found minute particles of iron, phosphorus and cobalt in the snow of the far north. orders. Road's mighty popular, but it's pretty independent, too. See, didn't one of the division superintendcuts down east discontinue one of the oldest stations on this line two or three years ago? But it's a mighty pleasant road to travel on. Always has such a pleasant class of passengers."

"Perhaps you tried the Baptist!" I guessed once more.

"Ah, ha!" said the brakeman, 'she's a daisy, isn't she? river road; and cobalt in the snow of the far north beautiful curves; sweep around anything to keep close to the river, but it's

The uniform green color of the vege thing to keep close to the river, but it's all steel rail and rock ballast, single track all the way and not a side track from the road house to the terminus. Takes a heap of water to run her through; double tanks at every station, and there isn't lan engine in the shops that can pull a pound or ran a mile in less than two guages. But it runs through a lovely country; these river roads always do; river on one side and hills on the other, and its a steady

hills on the other, and its a steady climb up the grade all the way till the climb up the grade all the way till the road ends where the fountain-head of the river begins. passengers throwed in. I tell you, pil-grim, you take the river road when For several years the attention of physicians and scientists has been directed to learning the nature of the poison producing those remittent and intermittent diseases variously known as marsh fever, malarial fever and fever the engine announced a station, and the brakeman hurried to the door, shout-Ing:
"Zionsville! This train makes no stops between here and Indianapolis!"
-[Burlington (Ia.) Hawkeye. and ague. The problem is at last solved. After exposing themselves for three weeks in that fever-stricken district, the Roman Campagna, Signor Tomasi, of Rome, and Prof. Klebs, of Prague, have discovered the source of malaria to be a mystoscenic forces. We are generally told in histories of banking, as, for instace, in that by Gilbert, that the first national bank was that of Venice, founded in the year 1157, but I agree with Mr. McLeod, that this institution was not at first in control of the property of the property of the source of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus. The next step for the benefit of malaria to be a microscopic fungus.

institution was not at first, in any sense a true bank. The state being deeply involved in debt, its creditors formed into a corporation, and the debts made transferable like our consols. It was not till 1587 that the institution began to take money on deposit. The denosit Prof. Proctor thus sums up the effect of climate upon mortality: "Fewer per-sons than usual die after a bitter wininto a corporation, and the debts made transferable like our consols. It was not till 1587 that the institution began to take money on deposit. The depositors received a credit on the bank's books equal to the exact weight of the bullion placed there, which the bank undertook to keep intact in its vanits and to repay to the depositors.

A fact probably but little known is nishes a key to metric measures and weights. This coin is two centimetres in diameter and its weight is five grammes. Five of them placed in a row will give the length of the decimetre, and two of them will weigh a deca-gramme. As a kilolitre is a cubic metre, the key to the measure of length is also the key to measures of capacity.

A curious belief among the natives of Burmah is that fireflies are employed as lamps by the weaver birds, the insects being caught by the birds and glued to their nests by pieces of soft mud. Mr. E. L. Layard finds this belief a superstition. He says, however, the bits of mud are always to be found in nests of the weaver birds, being probably used to cleanage the birds' bills. During the cleaning process it is probable a fire-fly is occasionally removed from a bird's mouth and stuck in the mud, being thus uninitentionally made to serve as a lamp instead of as a breakfast.

Several cases are reported in which scarlet fever, measles and other infections diseases have been spread by eats A curious belief among the natives of \$20,000; Edwin Booth, \$100,000 a year; Dr. Hall, of Fifth Avenue, and Dr. Dix, of Trinity, get \$15,000; while E. A. Sothern earns over \$150,000 as Lord

good deal of competition between the two roads, and our folks are getting afraid of losing travel."

"Presbyterian?" I asked.

"Narrow guage, ch?" said the brakeman, "pretty track, straight as a rule; tunnel right through a mountain rather than go around it; spirit-level grade; passengers have to show their lickets before they get on the train. Mighty strict road, but the cars are a little narrow; have to sit one in a seat and no room in the aisle to dance. Then there's no stop over tjekets allowed; get on at all. When the car's full, no extra coaches; cars built afthe shops to hold just so many and nobody else allowed on. But you don't often hear of an accident on this road. It's run right up to the rules."

"Maybe you joined the free thinkers?" I said.

"Scrub road," said the brakeman, "dirt road bed and to learn the said to a single preaches for \$12,000, and Joe Jeff through to the station you're ticketed for, or you can't get on at all. When the car's full, no extra coaches; cars built af the shops to hold just so many and nobody else allowed on. But you don't often hear of an accident on this road. It's run right up to the rules."

"Maybe you joined the free thinkers?" I said.

"Scrub road," said the brakeman, "dirt road bed and to learn the road in the road," said the brakeman, "dirt road bed and to learn the road in the r

"The Disadvantages of City Boys."

Of these eighty-eight men, twelve epent the first fifteen years of their life in the city, twelve in villages, and sixty-four were farmers' boys.

But of the twenty-four who lived in villages and cities, six were practically farmers' boys, for they lived in small villages, or on the ontskirts of cities, and had the same kind of work to do

going to school, we three boys used to work up the wood for winter use."

Four others told substantially the same story. As these were about the same as farmers' boys, we may add them to that list, so that seventy out of eighty-eight,—almost four-fifths of all

"Was generally employed," says one "during the summer months, and in vacatio is, in doing any kind of work that offered."

Four of the city boys were newsboys.
One of them says: "The last fear I was connected with the press, I carned one hundred dollars before breakfast."

assistance except my board from my eighth to my eleventh year."

Of all these eighty-eight boys, five cally had nothing particular to do.

While these boys were growing and working, a great many others,—sons of merchants and lawyers,—were growing up in Springfield, going to school and amusing themselves, as boys of their class are apt to do. Where are they? Only five of this class are heard from among the eighty-eight solid men of that city. Some of them, perhaps, are prosperous men in other cities, but it he number cannot be large, for in Springfield only five men out of eighty-eight came from this class. Ninety-four and a half per cent were either farmers' boys, or poor and hard-work-ing town hare.

"What is a woman's will?" shricks a
